

AKROSEAL SILICONE WATER REPELLANT

PRODUCT DESCRIPTION

Akroseal Silicone Water Repellent is a deep penetrating, weather resistant, water and dirt repellent, which seals brick, stone, concrete, and mortar surfaces against penetrating rain and water from garden irrigation systems, taps, or down pipes.

SPECIFICATIONS

All forms of surface contamination must be removed to ensure a smooth surface, free of moisture and loose material, or any other barrier to adhesion.

APPLICATION

During application, ensure adequate eye protection (goggles). Evenly apply by using a brush or low-pressure knapsack sprayer. Begin treating the surface from the highest point, working downwards. Wipe off any overspray on glass surfaces as well as window and door frames. Allow a three-hour flash off period. Apply a second coat, this time working from left to right. To achieve maximum penetration, avoid treating surfaces while warm or exposed to full sunlight. Do not apply onto wet surfaces. Do not apply prior to cementitious coatings. Coverage – 4msq to 6msq per litre. Two coat applications. Clean up with mineral turpentine.

TECHNICAL DATA

- | | |
|-------------------------------|---|
| • Colour | Clear |
| • Drying Time | 3 hrs @ 25 °C & 50 % RH |
| • Overcoating Time | Allow three hours flash off before over coating |
| • Spreading Rate | 4 to 10 sqm |
| • Solvent for Cleaning | Mineral Turpentine |
